Personal Statement

I am a keen problem solver with an eagerness to expand my knowledge in electrical and mechanical engineering. I hold a degree from Loughborough University in Robotics, Mechatronics and Control Engineering and currently work as a Technical Manager at Hawk-Eye Innovations. I excel in designing and delivering complex broadcast and tracking systems for global sporting events. I bring proven expertise in product development, client engagement, and team leadership, and I'm eager to apply and expand these skills on cutting-edge engineering projects.

Key Skills

Technical Skills

- Networking and firewall configuration
- CAD (Solidworks and Fusion 360)
- Electronics repair and design
- Programming (Python, C++, MATLAB)
- Broadcast system design and implementation

Soft Skills

- Project and team management
- Client relations with ATP, UEFA, ITF
- Leadership and teamwork under pressure
- Logical problem-solving mindset
- Calm and adaptable in live situations

Education

Loughborough University

2:1 Robotics, Mechatronics and Control Engineering

Key Modules: Digital and State Space Control, Industrial Machine Vision, Interfacing for Mechatronic Systems

Notable Projects:

- Spherical Parallel Manipulator: Remote broadcast camera alignment system
- Robotic Boxing Display: Preprogrammed dual robot entertainment display
- Smart Waste System: IoT-driven campus waste solution

Dollar Academy

Advanced Highers:

- Physics - A
- Mathematics of Mechanics – B

7 Highers, grade A-B, including Maths, Physics, Engineering Science and Economics.

Employment History

Technical Manager, Hawk-Eye Innovations, Basingstoke

(August 2020 to Present)

Achievements and responsibilities:

- Led design & deployment of Big Screen vision mixing systems at 7 stadiums during the 2025 Women's Euros, improving on-site setup efficiency and visual presentation consistency
- Delivery of numerous new features, pieces of software and hardware to enhance broadcast metrics of ATP tour and reduce set up times by up to 20%.
- Design and maintenance of the departments Firewalls and Network Switch configurations.
- Project management of many 15+ person teams globally at the largest ATP Masters 1000 events to broadcast 100+ matches to live TV.
- Consulting and assisting in the system design and implementation of Video Review at the US Open and all Masters 1000 Tennis Events.

Runner at the CPL, Sunset + Vine, Caribbean

(August - October 2018 and 2019)

Achievements and responsibilities:

- Assisting with management of a crew of over 40 people.
- Employed as a runner but having proved my organisational and management abilities, took on many of the roles of an assistant production manager.
- Quick thinking problem solving on a daily basis.
- Being on hand 24/7 to help solve issues with the logistics and movement of kit and crew.
- Assisting the uplink engineer in fixing the satellite when issues occurred, just in time to transmit the game.
- Worked alongside a team of engineers throughout the tour working on various areas of engineering in TV production.

Work Experience, Innovate Product Design, Salisbury

(August 2019)

Achievements and responsibilities:

- Given complete control over my own project with very little supervision by managers.
- Had to calculate, design and build my own large "rock tumbler" for the smoothing of 3D printed parts.
- Gained a good grasp of SolidWorks while designing parts of my project, using exact measurements to create parts that were 3D printed and incorporated in my final build.
- Used a variety of different items to create my build including mechanical parts, electrical components and many different materials.

Hobbies & Interests

I am a keen sportsperson; I played rugby and cricket for my school and university. In addition, I am a keen skier, Level 4 sailor and a qualified PADI open water diver. I also enjoy photography and videography, using drones and cameras along with video editing to make travel videos. At home, I spend a lot of my free time repairing electronic appliances given to me by friends or family, as well as designing and building some of my own projects, using 3D printers, making circuits and programming development boards to continue to sharpen my engineering skills.
